

CHEMICAL MANAGEMENT POLICY

To manage our chemical usage, we provide training for our personnel to raise awareness. We store our chemicals by type in designated areas for each department.

We maintain Material Safety Data Sheets (MSDS) for the chemicals used in our facility. We control pool chemicals and some cleaning chemicals using automatic dosing machines.

To reduce chemical consumption in pest control methods, we use adhesive traps in the kitchen, restaurant, goods reception, and staff entry areas of our facility.

We work with relevant firms to ensure the safe disposal of chemicals and monitor chemical waste. We train our employees on the measures to take in the event of spills or leaks of hazardous chemicals. We monitor our chemical usage and provide training to prevent waste and incorrect use of chemicals.
