

PURCHASING AND SUPPLY CHAIN POLICY

We prioritize conducting our supply chain and purchasing operations sustainably in all regions where we operate and represent.

Our procurement processes are carried out in compliance with relevant legal regulations and national-international standards. We give preference to suppliers who prioritize sustainability, manage their environmental and social impacts, and possess internationally recognized quality, environmental, and sustainability certifications.

We prioritize suppliers who use resources appropriately without harming natural life and ecosystems, comply with hunting regulations, minimize and manage waste, offer less packaging or bulk packaging alternatives, and utilize environmentally friendly, economical, local, ethical, recyclable, or recycled materials. We also seek organic, non-animal-tested, and non-toxic alternatives, emphasizing local suppliers from the district and nearby areas where our hotel is located.

By maintaining continuous communication with suppliers and conducting supplier audits, we contribute to the development of sustainability awareness. We provide feedback to suppliers to ensure the quality of the services we purchase meets certain standards, supporting their growth and creating a sustainable economy and trade.

Our supplier selection processes are conducted transparently and fairly.
